

Custom Standards

Certified reference materials,
standards and quality control samples

Are you looking for quality control standards to perfectly meet your needs? Breitländer, part of LGC Standards, offers customised standards to meet your specified requirements. It could not be simpler - use the form on the back to let us know what you need and return to us for a quotation.

Benefits

The benefits of using high-quality customized reference materials and standards are many and dependent on the application:

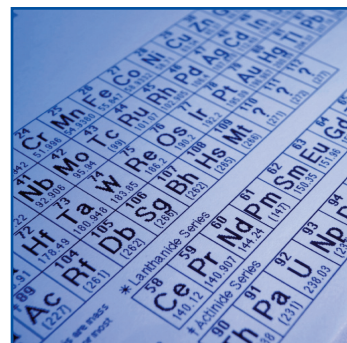

- Save time and money
- Save raw materials
- Avoid errors
- Avoid internal testing and re-testing to meet QC standards
- Available as required
- Supplied with Certificates of Analysis
- You specify the composition

Applications

We have supported our customers for their custom material needs for many years, developing expertise and knowledge to help them make the most of the options. Working closely with our partners we are able to offer customised:

- Metal Setting-Up Samples for OES
- Glass Setting-Up Samples for XRF
- Plastics for ROHS analysis
- Water-based standards for XRF, ICP and AAS
- Oil-based standards for XRF, ICP and AAS
- Layer thickness samples for (micro-) XRF
- Metal Certified Reference Materials and Reference Materials

We also offer custom Borate mixtures in combination with several additives for fusion equipment.

Breitländer offers a comprehensive range of certified reference materials and setting-up samples, working in close cooperation with some of the world's major manufacturers. This puts us in a unique position to make sure your company has the right materials for your quality assurance work. Our expert technical support staff can help you find the products best suited to your needs, applicable to standards such as ISO, EN, ASTM, JIS and DIN where available.
